# AgriAI · Demo day checklist

Offline demo mode
Hinglish – presenter ke liye

## Ek din pehle

- [ ] Laptop + backup phone + power bank **100% charge**; laptop charger aur extension board bag mein.
- [ ] `git pull`, phir `REBUILD=1 scripts/demo.sh` ek baar (build + install sab local).
- [ ] **Offline test:** Wi-Fi band karke `scripts/demo.sh` → poora demo ek baar chalayein.
- [ ] Laptop par Chrome: `localhost:4173`, F12 → device toolbar → 360 × 780 (phone jaisa).
- [ ] Demo photos phone/laptop mein: `backend/demo/photos/` (sarson rust, sarson chepa, bajra jogiya) + `seed-assets/handicraft.jpg` ("paudha nahi").
- [ ] Backup video `showcase/3-video/agriai-demo.mp4` laptop + phone + pen drive par.
- [ ] Deck PDF + brief PDF laptop par khule; 5 printed brief (Hindi) + 5 (English).

## Venue par (30 min pehle)

- [ ] Projector/HDMI test, screen **mirror**, font bada (Chrome zoom 125%).
- [ ] `scripts/demo.sh` → "DEMO READY" dikhe. Internet ki zaroorat nahi.
- [ ] Login check: sanyojak `9000000001`, रमेश `9000000101`, अनीता `9000000202` (PIN 2580).
- [ ] Notifications/WhatsApp/auto-update band; phone silent; laptop sleep off.
- [ ] Mobile hotspot **sirf backup** (asli phone par dikhane ke liye USB + chrome://inspect port forwarding).
- [ ] Volume theek – 🔊 "पूरा सुनें" ek baar test.

## Demo ke dauraan

- [ ] Shuru mein saaf bolein: **"Ye offline demo hai – AI ke asli jawab pehle record kiye gaye hain, data demo hai."**
- [ ] Sirf recorded photos aur sujhaye sawaal use karein (doosri photo par app "फोटो साफ नहीं" kehta hai – ye bhi dikhayein).
- [ ] Bechne ka vaakya bilkul yahi: **"दस क्विंटल बाजरा, पच्चीस सौ रुपये क्विंटल"** + bajra.jpg.
- [ ] Kuch atke → turant backup video (`agriai-demo.mp4`), maafi nahi, bas "recorded version dekhte hain".
- [ ] Koi sankhya bina source na bolein – brief/deck ke source wali hi.

## Agar kuch fail ho

| DIKKAT | KYA KAREIN |
|---|---|
| demo.sh nahi chala | Port busy? Purana demo band karein (Ctrl+C) aur dobara. Phir bhi nahi → video. |
| Photo par jawab nahi | Fasal sahi chuni? (sarson photo → सरसों). Recorded photo hi lein. |
| Data gadbad | Ctrl+C → `scripts/demo.sh` (har start par saaf demo data, ~30 sec). |
| Laptop band | Backup phone par video + printed brief. |

## Baad mein

- [ ] Ctrl+C se demo band (sab band ho jaata hai, koi data nahi bachta).
- [ ] Sawaal jo aaye, unke jawab Q&A doc mein jodein.
- [ ] Follow-up email: brief PDF + sampark.

Demo mode: `DEMO_MODE=true` recorded AI answers (`backend/demo/recordings.json`, `npm run demo:record` se asli Gemini se), ek recorded mausam. Production (NODE_ENV=production) mein ye mode chal hi nahi sakta – app start hone se mana karta hai (test se pakka).
